EDUCATION

Higher Technical Degree in Data Science & AI
ISTEA
In progress

QA Manager
EducaciónIT
In progress

Full Stack Web Development
IAC Quilmes
Completed

C# .NET Programming
IAC Quilmes
Completed

Certificates
EducaciónIT
Java, HTML, JavaScript, C# .NET, SQL, and Object-Oriented Programming with AI

SKILLS

Agentic AI
- Multi-agent systems · MCP
- RAG & vector DBs
- Vision / OCR

Automation
- OpenClaw · Hermes · Buzz Agents
- Odoo ERP integration

Programming
- Python · C# · SQL
- JavaScript / TypeScript
- Java (coursework)

Web & Infrastructure
- React / Next.js · Node.js
- REST APIs
- PostgreSQL / Supabase
- Docker · Linux / VPS
- Access control & audit logs

LANGUAGES

Spanish	Native
English	Basic

BAUTISTA CARRERA

AI DEVELOPER

Profile

AI Developer specializing in autonomous agents that run in production: integrated with real business systems (Odoo, WhatsApp, email), with human-in-the-loop control at every critical step. Full-stack background (C#, Node.js, Python, SQL, React) and a foundation in QA. Currently completing a Higher Technical Degree in Data Science & AI at ISTEA and a QA Manager program at EducaciónIT.

Experience

2025 — Present

Hitofusion

AI Developer

- Designed and shipped a document-processing agent that reads vendor invoices with vision, validates the extracted data with the user, and posts them to Odoo (accounting and VAT) as a draft pending human review.
- Built a multi-agent support system: one agent handles first contact and ticket creation over WhatsApp; a second performs deep technical diagnosis on the live system (including direct server access) and leaves internal notes before human escalation, so the team starts each ticket with the diagnosis already done.
- Developed an email-triage agent that syncs, classifies and prioritizes an executive's inbox, summarizes relevant threads and drafts context-aware replies, always pending human approval before sending.
- Built safeguards into the agents: human approval before any write or send, validation of extracted data, access control, secrets management and audit logs.
- Worked with developers and support staff in an agile team; tested each agent locally with use cases before deployment.

2025 — 2026

Envero Selecto | Freelance

Administrator

- Fully autonomous management of the business: customer service, sales, and stock/inventory coordination.

Featured Projects

Automated Accounting Agent
Vision-based invoice capture, human validation, then posting to Odoo, ready for VAT/accounting.

Support Agent Team
WhatsApp intake and technical diagnosis over SSH, with handoff notes for the human team.

Automated Email Agent
Inbox sync, classification and reply drafting for an executive; human approval required to send.
